Work Location:	31
Squad #	3161
Vehicle #	178
Radio #/Console position	
Location when problem arises?	
Date / Time of Issue:	3/5/2010 10:35 AM
District of occurrence	•
Device Type:	Portable Radio
Xmit/Rec Issue:	Both
Audio	Garbled
Transmit Tone:	
Receive Tones	Single Beep
Control Light Issue:	
Antenna	
Radio:	Turns On
Transmissions:	Neither Receive / Transmit
Problem Frequency	Continuous
Problem Seems:	Location Dependent
Narrative:	Responded to subject with a gun in Upon entering the I could not hear any transmit tones or even hear if the channel was free. Entered the MC (Video Control room) on the 2nd floor and my radio went dead, I could not hear anything on the radio. Had to use my cell phone to communicate with SGT on scene. My cell phone could send but had trouble receiving calls. With the onset of active shooters in schools this radio system is totally unacceptable. No excuses, we need a radio system that works and does not put officers or civilians lives at risk. I did not check the antenna symbol or the control lights.
