**Narrative:** On 03-11-10 at 3:56PM, I called for back up right after a fight broke out in a large crowd outside of [redacted] I had to immediately escort a student in cuffs into the school. Once in there, I didn't know where my partner was and the school staff was describing more fights breaking out over MPS radios (which worked just fine). I attempted to call for back up several times because my partner was alone with the mass population of students. I found it easier to log into Tiburon and send a message to the dispatcher from the office computer. I had the dispatcher document this for me in CAD#100701159.
