 |

Officer / Member: LUTZ

MPD Email Address

Work Location: 62

Squad # 6251

Vehicle # 183

Radio #/Console position

Location when problem arises?

Date / Time of Issue: 1/1/1900 12:00 AM

District of occurrence

Device Type: Mobile Radio

Xmit/Rec Issue: Both

Audio Garbled

Transmit Tone:

Receive Tones

Control Light Issue:

Antenna

Radio:

Transmissions: Neither Receive / Transmit

Problem Frequency Continuous

Problem Seems: Non Location Dependent

Narrative: In the middle of giving info, after receiving single "go ahead beep," a LOUD OBNOXIOUS ANNOYING tone will sound, until I unkey mic. Happens on squad radios. Happens on handhelds.

In the middle of transmitting once, another squad was able to COMPLETELY interrupt my transmission.

Also, all of the broadcasts that are done, the majority of them are garbled. They cut in and out.

Dispatch asks for all channels to broadcast, and the air is open, for an ungodly amount of time, before someone realizes it. It just happened again on Friday.

If we're going to have faulty equipment, can you stop paying to fix this crap, and start hiring MORE officers, so that we are better staffed and can get someone to help us?

I can honestly say, that if I'm at work, I can't transmit, I will either call 911, or 7472, while I'm fighting tooth and nail, because of faulty equipment.

And if I get hurt because of faulty equipment? Well, thats another story...
