<b>Narrative:</b>	While inside either [redacted] I could not transmit. I would push the button to transmit and hear a very faint single tone but immediately the transmission is cut. I can hear others broadcast which is location dependant. I have never been able to transmit from within the [redacted] since the inception of opensky. After consulting with others, it appears that no one can transmit from within the [redacted] building. This appears to be the same from within any [redacted] Transmitting is the main problem while receiving transmissions can be location dependant but not any worse than the analog radios.
