Narrative:	Radio is unable to break in when others are transmitting. Potential safety issue if an Officer is involved in a critical incident or fighting for their lives and can not get on the air to request help. If I attempt to transmit while another squad is on the air, my radio will beep repeatedly and not broadcast. I have heard rumors that there is an air in emergencies. 1. If such a button exists, I am unaware of its location and no instuction or training has been offered regarding that I am aware of.
