Audio	Intermittent
Transmit Tone:	Single Beep
Receive Tones	Beep every 5 seconds
Control Light Issue:	
Antenna	
Radio:	
Transmissions:	Neither Receive / Transmit
Problem Frequency	Continuous
Problem Seems:	Location Dependent
Narrative:	We responded to a foot pursuit and located the P.O. in the alley rear of I attempted to notify the dispatcher that we responded and setting up containment. I keyed the mic in the squad several times and each time I could not transmit and received a triple beeping tone. After several attempts I looked at the radio head and saw that PD02 had an open mic and would not allow me to transmit. After that cleared from the screen, I tried to transmit again, but received the familiar three beeps again. I heard a supervisor call out a subject matching the description and I made the stop. Approximately 5 minutes later, I was able to advise dispatch of the stop. I had to reposition my squad while maintaining containment at

Shortly after that, a city wide broadcast was done (before the foot pursuit was called by the supervisor) while there were officers on foot checking for the suspect.
