**Control Light Issue:**

**Antenna:**

**Radio:**

**Transmissions:**

**Problem Frequency:**

**Problem Seems:**

**Narrative:** During an field interview at above location subject became combative I attempted to call for backup several times, twice receiving triple beeps and the last time one beep and I told I had a 10-17 combative subject and send more squads, NEVER got through to the dispatcher. Thankfully there was a detective in the area at the time, received several scratches to the forearm during the scuffle which could of been prevented if help was sent.

**Comments**

Thank you for your trouble report submission.  
We checked into the radio issue that you reported and found that you did come over requesting a squad. However TCD didn't get your location. Squad 1230 came over stating that they are responding your call. Another squad came over indicating your location. You came over the air requesting a supervisor regarding a use of force. Even though you did not think assistance was on the way, they were.

We are working to ensure that the system is working properly and your report was valuable.
