Antenna	
Radio:	
Transmissions:	
Problem Frequency	
Problem Seems:	

Narrative: While on a traffic stop, I discovered that the connection from the radio to the handpiece cord was disconnected. I reconnected the connection terminal, and it worked. On my next traffic stop at _____ I observed that I could not transmit through my handheld radio, nor could I hear anything from the handpiece, only the actual radio. This created a very dangerous situation for me and my partner. I have encountered this problem quite frequently in the past, however it was not as dangerous as it was this time, discovering it while walking up to a vehicle during a traffic stop, on _____ The design/engineering of this connection needs to be improved.
