Problem Seems:

Narrative: During a foot pursuit, while trying to broadcast in the area of . I was unable to get through. Upon keying the mike on several occasions, the radio responded with two beeps. It should be noted, there was no radio traffic at that time. Due to the timing, my partner had to broadcast the pursuit while he stood at the scene of the initial stop with an uncooperative FI. While taking the subject into custody, I was unable to break through the radio chatter to give my position for responding squads. After several attempts, I was able to get through. It should be noted, I had the subject in hand restraints.
